About Oceandiva

Events really come to life at Oceandiva's sailing event locations. Experience the freedom of the water and at the same time the vibrant energy of the city. The blank canvas of the ships requires the most creative ideas; the possibilities are therefore endless. With a capacity of 100 to 1500 guests on board, Oceandiva offers the ideal place for an unforgettable business event in the Netherlands, Germany and Belgium.

Tailor-made events

While the Oceandiva Futura has three different levels with panoramic views of the surroundings thanks to the large windows, the Oceandiva Original has a five-meter high 'black box' with a loft as an eye-catcher. The Oceandiva Nova has a state-of-the-art design, the latest technologies and sails with a 2.2 MW battery.

The modern, warm-looking spaces of the Oceandiva ships serve as a blank canvas. This means that events can be fully adapted to the customer's wishes, in terms of appearance, design and branding. At Oceandiva you go for a completely tailor-made event!

The freedom of the water, in the heart of the city

Experience the freedom of the water and make your business event an unforgettable experience full of inspiration. The multifunctional rooms are suitable for all types of events. Consider a roadshow, product launch, brand event, car launch, a dinner with a view over the city skyline, a fashion show including catwalk or a summer festival that also uses the quay. The feeling of being on the water in combination with the conveniences and accessibility of the city makes every business event a unique experience. In short, Oceandiva combines the facilities of an event location in your favorite city with the freedom of a ship.

Sustainable event location ?

Oceandiva is taking the lead in a more sustainable future for the events industry. As a sailing event location, fuel consumption is unavoidable. What we do have control over is the type of fuel. The Oceandiva Original and Oceandiva Futura sail on HVO100. This biofuel is made from 100% certified waste or residual flows and reduces our CO2 emissions by up to 90%. Thanks to biofuel, there are also fewer particulate matter and nitrogen particles in the air and better air quality. The Oceandiva Nova is even fully electrically powered and equipped with a circular waste management system. Oceandiva's ships have therefore achieved the highest possible label in the field of sustainability in shipping, the Platinum label at the Green Awards.
